Ongoing consortium seeks UAV or air platform end user for European Defence Fund EDF-SMERO-NT project SILENCE on low-signature composite materials. A consortium is preparing a proposal for the European Defence Fund call EDF-SMERO-NT. The project develops low-signature composite materials for military aerial environments. An end user operating unmanned aerial vehicles or other aerial platforms is sought to define technical and operational requirements for the new material.

Medical centres/experts in imaging (oncology and cardiovascular), medical AI partners, health technology assessors and coordinator sought for image screening project under Digital Europe Programme - DIGITAL-2026-AI-PILOTING-10- SCREENING. A German AI/cloud and healthcare interoperability company is building a consortium for the EU Digital Europe call DIGITAL-2026-AI-PILOTING-10-SCREENING on AI-based medical image screening. The SME contributes the AI platform for collecting, processing and analysing imaging data from radiology centres. The SME is seeking clinical sites, a coordinator, a regulatory/compliance partner, HTA (Health Technology Assessment) / regulator and a communication officer for a R&D cooperation.

Partners sought in biobanking, regulatory strategy and scientific communication for an EIC Pathfinder Challenge proposal on biomarkers for healthy ageing. A French SME developing a biomarker-based diagnostic tool for healthy ageing, inflammatory diseases and cancer seeks partners for an EU project under the Healthy Ageing Challenge (Objective 2). The technology is already developed and requires clinical validation and deployment. Three partners sought: providers of clinical samples for retrospective studies, regulatory and market access experts, and dissemination and communication specialists.

Turkish research-performing SMEs seek Eurostars technology SME for coordinated ground and aerial robotic system for non-wearable workplace safety monitoring. Two Turkish R&D-performing SMEs seek a Eurostars-eligible technology SME to join a proposal-ready 24-month project on coordinated ground and aerial robots for non-wearable industrial safety monitoring. The proposal received a strong score in an EU-funded call and was placed at the top of the reserve list. The new partner should bring expertise in robotics, UAVs, edge AI, perception or safety software, lead a technical work package, and support integration, validation and market exploitation.

Turkish research-performing SMEs seek Eurostars technology SME for modular cybersecurity platform development and validation. Two Turkish R&D-performing SMEs seek a new Eurostars-eligible technology SME for the September 2026 resubmission of a 24-month modular cybersecurity platform project. The proposal received a high score and was accepted for funding in Türkiye, but the current EU partner's local funding was not approved. The new partner will replace the withdrawing partner, lead a technical work package, support integration and pilots, and contribute to European exploitation.

German research institute seeks European partners for an EU-funded project to recycle metal powders from waste into valuable materials through joint development, prototyping, and pilot projects. The German research institute is looking for partners for a research project on circular economy and resource efficiency. The development area is metal powder recycling from waste, which combines mechanical, thermal, and chemical processes for the recovery of valuable powder materials. The technology is suited for industries with powdery production waste or waste streams. The cooperation should include joint development, prototype manufacturing from recovered powder, and pilot projects.
